

MINT-TO LOGIC™ BRAND AMBASSADOR STRUCTURE (ValiPass Launch Edition)

1. TIERS OF BRAND AMBASSADORS

Tier	Title	Requirements	Rewards
Level 1: Promoter	Entry Ambassador	Daily posting from assistant content	Points + small rewards
Level 2: Influencer	Grows audience + posts consistently	>10 verified posts/week + audience engagement	Bonus credit + merch
Level 3: Strategist	Proven traffic generator + minor recruiting	Audience growth + referral lead gen	Commission on lead conversion
Level 4: Liaison	Manages multiple protocol accounts, trains team	Consistent protocol engagement + clean brand record	Royalty share + Circuit Leader invite
Level 5: Circuit Leader	Governs team of ambassadors for one protocol	Reviews others, maintains structure	% of circuit revenue or high-end prize pool

2. AMBASSADOR POSTING & ENGAGEMENT RULES

- All posts must:
 - Be generated by the assistant (no edits)
 - Use pre-approved imagery
 - Be posted according to optimized schedule (tracked by moderators or Slack reminders)

- Responses to comments must follow **brand tone guidelines**
 - Must **log or screenshot posts weekly** (or integrate with platform tracking)
-

3. ASSISTANT COMMENT-RESPONSE WORKFLOW

You don't trust ambassadors to "wing it."

You give them a **governed method** to handle comments using your assistant.

How it works:

1. Ambassador sees a comment or DM on their post
2. They **copy/paste the comment into the Assistant** under:
 - "Generate Brand Response to Audience Question"
3. Assistant returns a **formatted, on-brand, logic-aligned response**
4. Ambassador pastes reply to their post or sends DM

Why this matters:

- Prevents off-brand replies
 - Maintains protocol authority
 - Lets ambassadors "speak" Mint-to Logic even if they don't fully understand it yet
 - Evolves ambassadors into educators as they use this feature over time
-

4. GUIDELINES YOU SHOULD PROVIDE

Each Ambassador gets a **starter guide** with:

- What their role is (and is not)

- Post timing suggestions (timezone-optimized)
- Assistant use rules
- Do's & Don'ts for comments
- How they rank up
- How they're evaluated
- What "brand violations" look like (e.g., modifying posts, posting off-message)

5. REWARD SYSTEM (SUGGESTED BASE)

Action	Reward
1 approved post/day	10 points
Verified follower growth	1 point per 10 real followers
Top post of the week (engagement)	Bonus reward
First verified sale or lead	Flat bonus + level-up eligibility
Team growth (via invitation)	Team override bonus (if Circuit Leader)
Use assistant to answer comment	2–3 points per approved interaction

All points can be exchanged for:

- Gift cards
- Merch
- Service credits
- Circuit ownership (after 10K+ point consistency)

6. SCALABILITY AND CONTROL

- Every protocol runs a version of this system
 - Assistants can be updated weekly with new:
 - Post content
 - Response templates
 - Performance incentives
 - **Moderators and Circuit Leaders audit responses + flag issues**
 - Circuit growth becomes self-replicating and governed
-

NEXT STEPS I CAN HELP YOU WITH:

- Write a **Brand Ambassador Playbook** (Tier system, how to level up, what not to do)
- Draft an **Assistant prompt** for “Respond to a Comment” using logic-aligned language
- Design a **score tracker sheet** (Notion, Sheets, or Airtable)
- Build a **Slack rollout plan** for onboarding the first 10 ambassadors

You now have a full-circle structure:

- Governed posts
- Governed interaction
- Reward tied to verified effort
- Ambassador evolution into Protocol Liaison
